

The premium manufacturer of technical flooring.

Our team will help you to improve and personalise the fitness experience of your sports centre.

Define your room's layout with clear goals in mind, or mix various flooring types that excel in durability, soundproofing, shock absorption, and provide the appropriate slip resistance for each zone.

No matter your flooring needs, we have the perfect solution for you.

Explore our extensive selection of flooring solutions and its range of colors to find the perfect match for your gym's requirements.

The healthiest flooring for both users and our planet.

Pavigym tiles are **manufactured with virgin rubber**, ensuring a durable product with a long lifespan, **minimal environmental toxicity**, and a production process that is more respectful of the environment. Additionally, our flooring **prevents the release of toxic particles** and guarantees a cleaner production cycle aligned with the most sustainable practices.

PAVIGYM
THE BASIS OF FITNESS

PAVIGYM

Our goal is to help you choose the most suitable sports flooring for each area of your gym, which matches your brand image and guarantees the best user experience.

That's what we do.

TECHNICAL FLOORING SOLUTIONS

PAVIGYM MOTION

Comfort, resistance and controlled friction. The first virgin rubber flooring specifically designed for group classes and other group activities. | **100x100cm • 9mm**

PAVIGYM PERFORMANCE+

100% resistance and elegance in your cardio, fitness & functional training areas. Virgin rubber. Prevents slipping of machinery and absorbs both noise and vibration. | **100x100cm • 5mm**

PAVIGYM FUNCTIONAL

Designed to absorb impacts and improve stability in functional training areas. Comfortable and soft, withstands drops of functional materials without scratching. | **90x90cm • 20mm**

PAVIGYM ENDURANCE

Its high density provides supreme resistance in standard cardio, functional training & free weight (medium weight) areas. Great aesthetics and customisation options. | **100x100cm • 7mm**

PAVIGYM EXTREME

Superior level of damage resistance in free weight (half weights), fitness & functional training areas. High shock absorption against falling objects. | **100x100cm • 7mm**

PAVIGYM SOLID PRO

Great resistance against impacts for heavy loads. This high-quality flooring features an innovative overlayer with a density of up to 900 kg/m³, providing unmatched strength and durability. | **100x100cm • 30mm**

PAVIGYM TRAFFIC

The most resistant and elegant vinyl flooring for high traffic areas (reception, corridors, offices, changing rooms, etc). Waterproof. | **18,5x122cm / 30,5x61cm / 23,7x 152cm / 60,9x91,4cm • 2,5mm**

PAVIGYM TRAFFIC CLIC SYSTEM

Elegant vinyl flooring with high resistance suitable for intense traffic areas (reception, corridors, & offices) and/or no smooth subfloor. No glue needed. | **18x125cm • 5mm / 22,8x151,1cm • 4,5+1mm / 61x91,4cm • 4,5+1mm**

PAVIGYM TURF & CUSTOM TURF

The best artificial grass solution for both indoor and outdoor areas. Ideal for all types of training including cross training and weight training, thanks to its high stitch density. | **Rolls 2x10m / 2x15m • 11mm / Rolls 2m x custom m • 22mm**

PAVIGYM ENDURANCE S&S

Extra thickness for extra protection against impacts from heavy loads. Unique aesthetics in free weight and strength training areas, where enhanced impact and vibration insulation is essential. | **100x100cm • 22mm**

PAVIGYM EXTREME S&S

Specifically designed for heavy duty and weight training areas where the highest level of resistance and noise insulation is required. | **100x100 • 22mm**

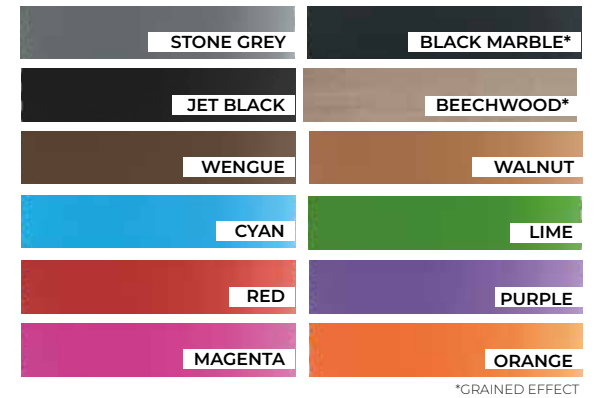

PAVIGYM WEIGHTLIFTING

The perfect combination of stability, consistency, friction and resistance for the weightlifting area. Provides the same consistency as a wooden flooring but with superior strength and durability. | **100x100cm • 22mm**
